

1] What is the purpose of the COMMIT and ROLLBACK commands in SQL?

Ans:

Purpose of COMMIT and ROLLBACK Commands in SQL

1. COMMIT Command:

The COMMIT command is used to save all changes made during the current transaction permanently to the database. Once a COMMIT is executed, the changes cannot be undone.

syntax:

```
COMMIT;
```

Example:

```
INSERT INTO students (student_id, student_name) VALUES (1, 'Prit Chhatrala');
```

```
COMMIT;
```

2. ROLLBACK Command:

The ROLLBACK command is used to undo changes made during the current transaction. It reverts the database to the state before the transaction began.

syntax:

```
ROLLBACK;
```

Example:

```
INSERT INTO students (student_id, student_name) VALUES (1, 'Prit  
Chhatrala');
```

```
ROLLBACK;
```
