

2] Write the general structure of an SQL SELECT statement.

Ans:

SELECT column1, column2, ...

FROM table name

WHERE condition

GROUP BY column

HAVING condition

ORDER BY column;

Explanation

1. SELECT: Specifies the columns to retrieve. Use * to select all columns.
2. FROM: Specifies the table to query data from.
3. WHERE: Filters rows based on a condition (optional).
4. GROUP BY: Groups rows with the same values into summary rows (optional).
5. HAVING: Filters groups based on a condition (optional).
6. ORDER BY: Sorts the result by one or more columns in ascending (ASC) or descending (DESC) order (optional).
