

1] Define the INSERT, UPDATE, and DELETE commands in SQL.

Ans:

INSERT, UPDATE, and DELETE Commands in SQL

1. INSERT Command

Definition:

The INSERT command is used to add new rows of data into a table in a database.

Syntax:

```
INSERT INTO table_name (column1, column2, column3, ...)  
VALUES (value1, value2, value3, ...);
```

Example:

```
INSERT INTO students (student_id, student_name, age, class, address)  
VALUES (1, 'John Doe', 15, '10th', '123 Main St');
```

2. UPDATE Command

Definition:

The UPDATE command is used to modify existing rows of data in a table in a database.

Syntax:

```
UPDATE table_name
```

```
SET column1 = value1, column2 = value2, ...  
WHERE condition;
```

Example:

```
UPDATE students  
SET age = 22, address = 'rajkot'  
WHERE student_id = 10;
```

3. DELETE Command

Definition:

The DELETE command is used to delete existing rows of data from a table in a database.

Syntax:

```
DELETE FROM table_name  
WHERE condition;
```

Example:

```
DELETE FROM students  
WHERE student_id = 1;
```
