

1] What is the SELECT statement, and how is it used to query data?

Ans:

The SELECT Statement in SQL

Definition:

The SELECT statement is used in SQL to query (retrieve) data from one or more tables in a database. It allows you to specify which columns to retrieve and can include conditions to filter the data.

Syntax:

```
SELECT column1, column2, ...
```

```
FROM table_name
```

```
WHERE condition;
```
